
Listed Volatility and Variance Derivatives

Release 0.5 (February 2016)

Dr. Yves J. Hilpisch

February 03, 2016

I	Introductory Part	1
1	Derivatives, Volatility and Variance	3
1.1	Option Pricing and Hedging	3
1.2	Notions of Volatility and Variance	5
1.3	Listed Volatility and Variance Derivatives	6
1.4	Volatility and Variance Trading	10
1.5	Python as Our Tool of Choice	13
1.6	Quick Guide Through Rest of the Book	13
2	Introduction to Python	17
2.1	Python Basics	17
2.2	NumPy	25
2.3	pandas	33
2.4	Conclusions	46
3	Model-Free Replication of Variance	47
3.1	Introduction	47
3.2	Spanning with Options	47
3.3	Log Contracts	48
3.4	Static Replication of Realized Variance and Variance Swaps	49
3.5	Constant Dollar Gamma Derivatives and Portfolios	49
3.6	Practical Replication of Realized Variance	50
3.7	VSTOXX as Volatility Index	55
3.8	Conclusions	57
II	Listed Volatility Derivatives	59
4	Data Analysis and Strategies	61
4.1	Introduction	61
4.2	Retrieving Base Data	61
4.3	Basic Data Analysis	67
4.4	Correlation Analysis	70
4.5	Constant Proportion Investment Strategies	74
4.6	Conclusions	81
5	VSTOXX Index	83
5.1	Introduction	83
5.2	Collecting Option Data	84
5.3	Calculating the Sub-Indexes	91

5.4	Calculating the VSTOXX Index	98
5.5	Conclusions	101
5.6	Python Scripts	103
6	Valuing Volatility Derivatives	113
6.1	Introduction	113
6.2	The Valuation Framework	113
6.3	The Futures Pricing Formula	114
6.4	The Option Pricing Formula	115
6.5	Monte Carlo Simulation	118
6.6	Automated Monte Carlo Tests	122
6.7	Model Calibration	133
6.8	Conclusions	142
6.9	Python Scripts	142
7	Advanced Modeling of the VSTOXX Index	157
7.1	Introduction	157
7.2	Market Quotes for Call Options	157
7.3	The SRJD Model	160
7.4	Term Structure Calibration	161
7.5	Option Valuation by Monte Carlo Simulation	167
7.6	Model Calibration	171
7.7	Conclusions	182
7.8	Python Scripts	182
8	Terms of the VSTOXX and its Derivatives	193
8.1	The EURO STOXX 50 Index	193
8.2	The VSTOXX Index	194
8.3	VSTOXX Futures Contracts	194
8.4	VSTOXX Options Contracts	195
8.5	Conclusions	197
III	Listed Variance Derivatives	199
9	Realized Variance and Variance Swaps	201
9.1	Introduction	201
9.2	Realized Variance	201
9.3	Variance Swaps	206
9.4	Variance vs. Volatility	218
9.5	Conclusions	220
10	Variance Futures at Eurex	221
10.1	Introduction	221
10.2	Variance Futures Concepts	222
10.3	Example Calculation for a Variance Future	227
10.4	Comparison of Variance Swap and Future	230
10.5	Conclusions	230
11	Trading and Settlement	233
11.1	Introduction	233
11.2	Overview of Variance Futures Terms	233
11.3	Intraday Trading	234

11.4	Trade Matching	236
11.5	Different Traded Volatilities	236
11.6	After the Trade Matching	237
11.7	Further Details	238
11.8	Conclusions	239
IV	DX Analytics	241
12	DX Analytics — An Overview	243
12.1	Introduction	243
12.2	Modeling Risk Factors	244
12.3	Modeling Derivatives	246
12.4	Derivatives Portfolios	248
12.5	Conclusions	251
13	DX Analytics — Square-Root Diffusion	253
13.1	Introduction	253
13.2	Data Import and Selection	253
13.3	Modeling the VSTOXX Options	255
13.4	Calibration of the VSTOXX Model	256
13.5	Conclusions	262
13.6	Python Scripts	262
14	DX Analytics — Square-Root Jump Diffusion	269
14.1	Introduction	269
14.2	Modeling the VSTOXX Options	269
14.3	Calibration of the VSTOXX Model	273
14.4	Calibration Results	277
14.5	Conclusions	282
14.6	Python Scripts	282
	Bibliography	297
	Index	299
